Notes:

- (1) Further detailed information could be found in the common reporting format tables of the Party's greenhouse gas inventory, namely "Emission trends (CO₂)", "Emission trends (CH₄)", "Emission trends (N₂O)" and "Emission trends (HFCs, PFCs and SF₆)", which is included in an annex to this biennial report.
- (2) 2011 is the latest reported inventory year.
- (3) 1 kt CO₂ eq equals 1 Gg CO₂ eq.

Abbreviation: LULUCF = land use, land-use change and forestry.

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^b Includes net CO₂, CH₄ and N₂O from LULUCF.

" The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

" The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

Emissions of NF₃ - (kt CO₂ equivalent)	NA, NO	NA, NE, NO	NA, NE, NO	NA, NE, NO	NA, NE, NO	NA, NO	
NF ₃	NA, NO	NA, NE, NO	NA, NE, NO	NA, NE, NO	NA, NE, NO	NA, NO	

Abbreviations : CRF = common reporting format, LULUCF = land use, land-use change and forestry.

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^cEnter actual emissions estimates. If only potential emissions estimates are available, these should be reported in this table and an indication for this be provided in the documentation box. Only in these rows are the emissions expressed as CO₂ equivalent emissions.

^dIn accordance with the "Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part I: UNFCCC reporting guidelines on annual inventories", HFC and PFC emissions should be reported for each relevant chemical. However, if it is not possible to report values for each chemical (i.e. mixtures, confidential data, lack of disaggregation), this row could be used for reporting aggregate figures for HFCs and PFCs, respectively. Note that the unit used for this row is kt of CO₂ equivalent and that appropriate notation keys should be entered in the cells for the individual chemicals.)

ESP_BR2_v1.0

Description of quantified economy-wide emission reduction target: base year^a

<i>Party</i>	<i>Spain</i>	
Base year /base period	1990	
Emission reduction target	% of base year/base period	% of 1990 ^b
	20.00	20.00
Period for reaching target	BY-2020	

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b Optional.

Description of quantified economy-wide emission reduction target: gases and sectors covered^a

<i>Gases covered</i>		<i>Base year for each gas (year):</i>	
CO ₂		1990	
CH ₄		1990	
N ₂ O		1990	
HFCs		1990	
PFCs		1990	
SF ₆		1990	
NF ₃			
Other Gases (specify)			
Sectors covered ^b	Energy	Yes	
	Transport ^f	Yes	
	Industrial processes ^g	Yes	
	Agriculture	Yes	
	LULUCF	No	
	Waste	Yes	
	Other Sectors (specify)		
	Aviation in the scope of EU-ETS	Yes	

Abbreviations : LULUCF = land use, land-use change and forestry.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b More than one selection will be allowed. If Parties use sectors other than those indicated above, the explanation of how these sectors relate to the sectors defined by the IPCC should be provided.

^f Transport is reported as a subsector of the energy sector.

^g Industrial processes refer to the industrial processes and solvent and other product use sectors.

Description of quantified economy-wide emission reduction target: global warming potential values (GWP)^a

<i>Gases</i>	<i>GWP values^b</i>
CO ₂	4th AR
CH ₄	4th AR
N ₂ O	4th AR
HFCs	4th AR
PFCs	4th AR
SF ₆	4th AR
NF ₃	4th AR
Other Gases (specify)	

Abbreviations : GWP = global warming potential

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b Please specify the reference for the GWP: Second Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) or the Fourth Assessment Report of the IPCC.

Description of quantified economy-wide emission reduction target: approach to counting emissions and removals from the LULUCF sector^a

Role of LULUCF	LULUCF in base year level and target	Excluded
	Contribution of LULUCF is calculated using	

Abbreviation : LULUCF = land use, land-use change and forestry.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudge the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

Description of quantified economy-wide emission reduction target: market-based mechanisms under the Convention^a

<i>Market-based mechanisms under the Convention</i>	<i>Possible scale of contributions (estimated kt CO₂ eq)</i>
CERs	
ERUs	
AAUs ⁱ	
Carry-over units ^j	
Other mechanism units under the Convention (specify) ^d	
The Climate and Energy Package allows Certified Emission Reductions (CERs) and Emission Reduction Units (ERUs) to be used for compliance purposes, subject to a number of restrictions. In addition, the legislation foresees the possible recognition of units from new market mechanisms provided that the necessary legal arrangements to create such units are in place. Under the EU ETS the limit is up to 50% of the required reduction below 2005 levels. In the sectors not covered by the ETS, annual use shall not exceed to 3 % of each Member States' non-ETS greenhouse gas emissions in 2005. A limited number of Member States, including Spain, may use an additional 1%, from projects in LDCs or SIDS subject to specific conditions layed down in the Effort Sharing Decision.	
CERs: The use of these units under the ETS Directive and the Effort Sharing Decision is subject to the limits specified above which do not separate between CERs and ERUs, but include additional criteria for the use of CERs. Use of CERs and ERUs cannot be quantified at the time of reporting.	
ERUs: The use of these units under the ETS Directive and the Effort Sharing Decision is subject to the limits specified above which do not separate between CERs and ERUs, but include additional criteria for the use of ERUs. Use of CERs and ERUs cannot be quantified at the time of reporting.	
AAUs: AAUs for the period 2013-2020 have not yet been determined. The EU expects to achieve its 20% target for the period 2013-2020 with the implementation of the ETS Directive and the ESD Decision in the non-ETS sectors which do not allow the use of AAUs from non-EU Parties.	
Carry over units: The exact number of carry-over units for the EU and its Member States from the first commitment period that can be used for compliance during the period 2013-2020 can only be determined after the true-up period of the first commitment period. The Royal Decree 986/2015 of 30th October allows the carryover of units of private ownership subject to certain limitations. It also orders the carryover of units of public ownership. As to the figures, it is not possible to give values at this time, since the true-up process is underway and numbers still can slightly change.	
Other mechanism units: There are general provisions in place in the EU legislation that allow for the use of such units provided that the necessary legal arrangements for the creation of such units have been put in place in the EU which is not the case at the point in time of the provision of this report.	

Abbreviations : AAU = assigned amount unit, CER = certified emission reduction, ERU = emission reduction unit.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^d As indicated in paragraph 5(e) of the guidelines contained in annex I of decision 2/CP.17 .

ⁱ AAUs issued to or purchased by a Party.

^j Units carried over from the first to the second commitment periods of the Kyoto Protocol, as described in decision 13/CMP.1 and consistent with decision 1/CMP.8.

Description of quantified economy-wide emission reduction target: other market-based mechanisms^a

<i>Other market-based mechanisms (Specify)</i>	<i>Possible scale of contributions (estimated kt CO₂ eq)</i>
Other possible scale of contributions of market-based mechanisms: There are general provisions in place in the EU legislation that allow for the use of such units provided that the necessary legal arrangements for the creation of such units have been put in place in the EU which is not the case at the point in time of the provision of this report.	

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

Description of quantified economy-wide emission reduction target: any other information^{a,b}

Legally binding target trajectories for the period 2013-2020 are enshrined in both the EU-ETS Directive (Directive 2003/87/EC and respective amendments) and the Effort Sharing Decision (Decision No 406/2009/EC). These legally binding trajectories not only result in a 20% GHG reduction in 2020 compared to 1990 but also define the EU's annual target pathway to reduce EU GHG emissions from 2013 to 2020. The Effort Sharing Decision sets annual national emission targets for all Member States for the period 2013-2020 for those sectors not covered by the EU emissions trading system (ETS), expressed as percentage changes from 2005 levels. In March 2013, the Commission formally adopted the national annual limits throughout the period for each Member State. By 2020, the national targets will collectively deliver a reduction of around 10% in total EU emissions from the sectors covered compared with 2005 levels. The emission reduction to be achieved from the sectors covered by the EU ETS will be 21% below 2005 emission levels.

 Aviation in the scope of the EU-ETS: In principle, the EU ETS should cover CO₂ emissions of all flights arriving at, and departing from, airports in all EU Member States, Norway, Iceland and Liechtenstein and closely related territories. However, since 2012, flights to and from aerodromes from other countries have not been included in the EU ETS. This exclusion was taken in order to facilitate negotiation of a global agreement to address aviation emissions in the forum of the International Civil Aviation Organisation (ICAO). The EU has decided on a reduced scope in the 2013–2016 period (Regulation (EU) No 421/2014 of the European Parliament and of the Council of 16 April 2014).

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b This information could include information on the domestic legal status of the target or the total assigned amount of emission units for the period for reaching a target. Some of this information is presented in the narrative part of the biennial report.

Rg UE 517/2014, sobre gases fluorados de efecto invernadero (phase down), y Ley 16/2013, de 29 de octubre, por la que se establecen determinadas medidas en materia de fiscalidad medioambiental y se adoptan otras medidas tributarias y financieras (impuesto nacional a los gases fluorados de efecto invernadero - art 5)*	Industry/industrial processes	HFCs, PFCs, SF ₆	Medidas de reducción de emisiones de gases fluorados y sustitución de gases fluorados por otras sustancias	Regulatory	Adopted	Establece una serie de medidas para reducción de emisiones de gases fluorados: retirada progresiva a la comercialización HFCs, prohibiciones en equipos nuevos y prohibición de emisiones de HFC-23 en fabricación de HFCs	2014	Ministerio de Agricultura, Alimentación y Medio Ambiente y Ministerio de Hacienda		2,755.50
RD 795/2010, sobre comercialización de gases fluorados y certificación de profesionales que manipulan estos gases*	Industry/industrial processes	N ₂ O, HFCs, SF ₆	Medidas de reducción de emisiones de gases fluorados	Regulatory	Implemented	Establece los requisitos para la certificación de empresas y profesionales que manipulan gases fluorados de efecto invernadero	2010	Ministerio de Agricultura, Alimentación y Medio Ambiente		
Acuerdo voluntario SF6 - sector eléctrico (PENDIENTE DE APROBAR)*	Industry/industrial processes	SF ₆	Medidas de reducción de emisiones de gases fluorados	Voluntary Agreement	Implemented	Acuerdo voluntario para la reducción de emisiones de SF6 en el sector de la generación y suministro de energía eléctrica	2015	Ministerio de Agricultura, Alimentación y Medio Ambiente		

Table 3

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
Estrategia Española de Movilidad Sostenible*	Transport	CO ₂	Cambio modal en pasajeros hacia modos de transporte público o no motorizados	Other (Regulatory)	Adopted	Se trata de un documento estratégico que define las directrices a tener en consideración para conseguir una movilidad más sostenible en España. Estas directrices se pretende que sean tenidas en consideración por distintos actores de movilidad, municipios, empresas, etc. En el marco de esta estrategia se celebra la Semana Europea de la Movilidad en España y el Observatorio de Movilidad Metropolitana	2009	Ministerio de Agricultura, Alimentación y Medio Ambiente		
Plan Estratégico de Infraestructuras, Transporte y Vivienda (PITVI) - PASAJEROS*	Transport	CO ₂	Cambio modal en pasajeros hacia modos de transporte público o no motorizados	Other (Regulatory)	Adopted	Define directrices básicas en infraestructuras del transporte en los próximos años. El Programa Operativo de Fondos comunitarias preve una financiación de 1700 Millones de euros hasta 2020 para financiar actuaciones del PITVI (más 700 Millones de euros que ponen los EEMM)	2014	Ministerio de Fomento		600.00
Plan Estratégico de Infraestructuras, Transporte y Vivienda (PITVI) - MERCANCÍAS y Estrategia Logística de España*	Transport	CO ₂	Cambio modal en mercancías de carretera al tren	Other (Regulatory)	Adopted	Definir una serie de medidas para mejorar el transporte de mercancías en España favoreciendo la multimodalidad y el trasvase modal al ferrocarril en el transporte de mercancías. El Programa Operativo de Fondos comunitarias preve una financiación de 1700 Millones de euros hasta 2020 para financiar actuaciones del PITVI (más 700 Millones de euros que ponen los EEMM)	2014	Ministerio de Fomento		500.00
Autopistas del Mar*	Transport	CO ₂	Cambio modal en mercancías de carretera al barcio	Other (Regulatory)	Adopted	Favorecer el trasvase modal en el transporte de mercancías internacional de la carretera al ferrocarril por medio de rutas marítimas entre puertos de España y de otros países de la UE como Italia y Francia	2010	Ministerio de Fomento		25.00
Estrategia Integral para el Impulso del Vehículo Eléctrico en España y PLANES MOVELE*	Transport	CO ₂	Coche eléctrico	Other (Regulatory)	Adopted	Medidas para favorecer la penetración del vehículo eléctrico e incentivos la compra de vehículos eléctricos tales creación de infraestructuras de recarga, incentivos a la compra de coche eléctrico. En el marco de esta estrategia de ha desarrolla diversas normas legilativas en España. Por su parte los planes MOVELE conceden ayudas a la compra de vehículos eléctrico (de hata 6000 euros en el caso de vehículos turismos)	2010	Instituto para la Diversificación y el ahorro de la energía		30.00

Table 3

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
Programa de Incentivos al Vehículo Eficiente - Planes PIVE Planes PIVE I, II, III y IV, V, VI y VII)*	Transport	CO ₂	Mejora de la eficiencia de los vehículos	Economic	Adopted	Ayudas para la adquisición de vehículos ligeros nuevos y eficientes y achatarramiento de vehículos viejos	2012	Instituto para la Diversificación y el ahorro de la energía		250.00
Plan de Impulso al Medio Ambiente Planes PIMA - Aire (I, II, III y IV)*	Transport	CO ₂	Mejora de la eficiencia de los vehículos	Economic	Adopted	Ayudas para la adquisición de vehículos comerciales ligeros nuevos y eficientes y achatarramiento de vehículos comerciales viejos	2013	Ministerio de Agricultura, Alimentación y Medio Ambiente		65.00
Plan de impulso al medio ambiente - PIMA Transporte*	Transport	CO ₂	Mejora de la eficiencia de los vehículos	Economic	Adopted	Ayuda para el achatarramiento de camiones y autobuses	2014	Ministerio de Agricultura, Alimentación y Medio Ambiente		
Cursos de conducción eficiente en el transporte por carretera*	Transport	CO ₂	Mejora del comportamiento	Education	Adopted	Impartición de cursos entre conductores sobre conducción eficiente en el transporte por carretera . Se van a financiar a través del Fondo de Eficiencia energética	2005	Instituto para la Diversificación y el ahorro de la energía		175.00
Ley de Presupuestos 2014 - Obligación de municipios de más de 50,000 hab para acceder a subvenciones de tener un plan movilidad urbana*	Transport	CO ₂	Cambio modal en pasajeros hacia modos de transporte público o no motorizados	Economic	Adopted	Introducción de la obligación que entidades locales de más de 50,000 habitantes tenga aprobado un plan de movilidad para recibir subvenciones de los Presupuestos Generales del Estado para financiación del transporte colectivo de viajeros (Ayuda a la implementación de otras medidas de trasvase modal)	2014	HACIENDA		
Ayudas para la implantación de sistemas de gestión de flotas de vehículos*	Transport	CO ₂	Mejora del comportamiento	Economic	Adopted	Ayudas a empresas de logística para implantación de sistemas eficientes de gestión de flotas de vehículos. Se van a financiar a través del Fondo de Eficiencia energética	2005	Instituto para la Diversificación y el ahorro de la energía		17.50
Ayudas para la financiación de planes de movilidad urbana y planes de movilidad empresarial *	Transport	CO ₂	Cambio modal en pasajeros hacia modos de transporte público o no motorizados	Economic	Adopted	Ayudas a municipios para el desarrollo de planes de movilidad urbana. El programa operativo de los fondos comunitarios de la AGE prevé una ayuda de 750 Millones de euros para promocionar la movilidad urbana sostenible. El fondo de Eficiencia Energética también incluya una partida para financiar planes de movilidad	2005	Instituto para la Diversificación y el ahorro de la energía		300.00

Real Decreto-ley 6/2010, de 9 de abril, de medidas para el impulso de la recuperación económica y el empleo. - Vale transporte *	Transport	CO ₂	Cambio modal en pasajeros hacia modos de transporte público o no motorizados	Fiscal	Adopted	Desgravación de Impuesto de la Renta de Personas Físicas por pagos a trabajadores para uso de medios de transporte colectivo	2010	HACIENDA		9.00
Ley 34/2007, de 15 de noviembre, de calidad del aire y protección de la atmósfera - Impuesto de matriculación*	Transport	CO ₂	Mejora de la eficiencia de los vehículos	Fiscal	Adopted	Establece que el impuesto se grave en función del nivel de emisiones de CO ₂ de los vehículos	2008	HACIENDA		
Modificación de la normativa vigente sobre pesos y dimensiones máximas en el transporte por carretera (En tramitación)*	Transport	CO ₂	Mejora de la eficiencia	Regulatory	Planned	Incremento de la altura de los vehículos de 4 a 4,5m con carácter genera. Incremento de la longitud y peso de los vehículos, incluida la carga transportada, ya sea ésta divisible o indivisible, previa autorización especial y para flujos muy concretos		Ministerio de Fomento		
Modificación del Reglamento General de Circulación (EN TRAMITACION)*	Transport	CO ₂	Mejora del comportamiento	Regulatory	Planned	Modifica los límites generales de velocidad establecidos a los vehículos en los distintos tipos de carreteras. Así en carreteras convencionales y ciudad disminuyen y en autopistas y autovías se pueden incrementar bajo determinadas circunstancias. Asimismo define directrices para regular el uso de la bicicleta		INTERIOR		
Orden INT/2229/2013, de 25 de noviembre, por la que se regula el acceso a los permisos de circulación*	Transport	CO ₂	Mejora del comportamiento	Education	Adopted	Estable la obligación que los cursos para la obtención de permisos de conducción tenga una parte de conducción eficiente	2014	INTERIOR		105.00
Rg 333/2014 y Rg 253/2014 objetivos de reducción de emisión en 2020 para turismos y furgonetas*	Transport	CO ₂	Mejora de la eficiencia de los vehículos		Adopted	Objetivos de reducción de emisiones que deben cumplir los fabricantes de coches en la UE	2015	INTERIOR		2.274.75

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
Registro de huella de carbono, compensación y proyectos de absorción (RD 163/2014)*	Cross-cutting	CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ , NF ₃	Multi-sectoral policy	Other (Voluntary Agreement)	Implemented	Fomentar el cálculo de huella de carbono por las organizaciones españolas, incidiendo en su reducción. Fomentar el incremento de la capacidad sumidero de España mediante la posibilidad de que las organizaciones compensen su huella con absorciones inscritas en el Registro	2014	Ministerio de Agricultura, Alimentación y Medio Ambiente		2.05
Proyectos clima*	Cross-cutting	CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ , NF ₃	Multi-sectoral policy	Economic	Implemented	Fomentar las reducciones de emisiones de gases de efecto invernadero en los sectores difusos mediante la compra de las reducciones verificadas de proyectos puestos en marcha en territorio nacional. Se lanzan convocatorias anuales.	2012	Ministerio de Agricultura, Alimentación y Medio Ambiente		663.06
Régimen europeo de comercio de derechos de emisión*	Industry/industrial processes	CO ₂ , N ₂ O, PFCs	"Switch to less carbon-intensive fuels Efficiency improvement in industrial end-use sectors Installation of abatement technologies"	Other (Regulatory)	Implemented	El Régimen Europeo de Comercio de derechos de emisión es un instrumento de mercado de escala europea que tiene por objetivo lograr la reducción de las emisiones de gases de efecto invernadero de los sectores energético e industrial. El objetivo medioambiental del régimen viene determinado a través del techo de asignación, que constituye el número máximo de derechos de emisión que se ponen en circulación y, por tanto, limita la cantidad máxima de emisiones de gases de efecto invernadero de los sectores regulados a la atmósfera. En la 3ª Fase del régimen se ha definido el techo de asignación para el año 2013 contemplándose una reducción lineal del 1,74% anual que permite alcanzar el objetivo de reducción del 21% respecto a los niveles de 2005 en 2020.	2005	MAGRAMA		
Restauración de la cubierta forestal y ampliación de la superficie arbolada*	Forestry/LULUCF	CO ₂ , CH ₄ , N ₂ O	afforestation and reforestation	Other (Economic)	Implemented	Forestaciones y reforestaciones bajo diversos programas	1990

Gestión forestal sostenible*	Forestry/LULUCF	CO ₂ , CH ₄ , N ₂ O	"Enhanced forest management strengthening protection against natural disturbances"	Other (Economic)	Implemented	"Gestión forestal sostenible en sentido amplio, incluyendo ordenaciones, tratamientos selvícolas, prevención y extinción de incendios, defensa del monte, ordenación cinegética etc. Conservación de carbono en los bosques existentes, mejora de la producción en los bosques existentes, incremento de las reservas de productos de madera"	1990			
Programas operativos de las Comunidades Autónomas*	Cross-cutting	CO ₂ , CH ₄ , N ₂ O, HFCs	Multi-sectoral policy	Economic	Adopted	Los trabajos de programación de la Política de Cohesión 2014-2020 contemplan la elaboración de distintos documentos estratégicos entre los que se encuentran los Programas operativos regionales. En estos se incluyen medidas de mitigación del cambio climático, especialmente en el Objetivo temático 4.	2014			171.29
Financiación de proyectos de demostración. Programa NER300	Energy	CO ₂ , N ₂ O, PFCs	Fomento de la construcción de proyectos de captura y almacenamiento geológico de CO ₂ y de tecnologías de innovadoras de energía renovable en el territorio de la UE	Research	Planned	Se trata de un programa de demostración consistente en la selección y financiación, a partir de los ingresos obtenidos de la monetización de 300 millones de derechos de emisión de parte de los costes de inversión de hasta 12 proyectos comerciales de demostración	2013	COM		

Note : The two final columns specify the year identified by the Party for estimating impacts (based on the status of the measure and whether an ex post or ex ante estimation is available).

Abbreviations : GHG = greenhouse gas; LULUCF = land use, land-use change and forestry.

^a Parties should use an asterisk (*) to indicate that a mitigation action is included in the 'with measures' projection.

^b To the extent possible, the following sectors should be used: energy, transport, industry/industrial processes, agriculture, forestry/LULUCF, waste management/waste, other sectors, cross-cutting, as appropriate.

^c To the extent possible, the following types of instrument should be used: economic, fiscal, voluntary agreement, regulatory, information, education, research, other.

^d To the extent possible, the following descriptive terms should be used to report on the status of implementation: implemented, adopted, planned.

^e Additional information may be provided on the cost of the mitigation actions and the relevant timescale.

^f Optional year or years deemed relevant by the Party.

Custom Footnotes

Table 4

Reporting on progress^{a, b}

	<i>(kt CO₂ eq)</i>	<i>(kt CO₂ eq)</i>	<i>(number of units)</i>	<i>(kt CO₂ eq)</i>	<i>(number of units)</i>	<i>(kt CO₂ eq)</i>
(1990)	296,364.90					
2010	369,639.80					
2011	369,347.80					
2012	362,356.40					
2013	335,313.00					
2014						

Abbreviation : GHG = greenhouse gas, LULUCF = land use, land-use change and forestry.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b For the base year, information reported on the emission reduction target shall include the following: (a) total GHG emissions, excluding emissions and removals from the LULUCF sector; (b) emissions and/or removals from the LULUCF sector based on the accounting approach applied taking into consideration any relevant decisions of the Conference of the Parties and the activities and/or land that will be accounted for; (c) total GHG emissions, including emissions and removals from the LULUCF sector. For each reported year, information reported on progress made towards the emission reduction targets shall include, in addition to the information noted in paragraphs 9(a–c) of the UNFCCC biennial reporting guidelines for developed country Parties, information on the use of units from market-based mechanisms.

^c Parties may add additional rows for years other than those specified below.

^d Information in this column should be consistent with the information reported in table 4(a)I or 4(a)II, as appropriate. The Parties for which all relevant information on the LULUCF contribution is reported in table 1 of this common tabular format can refer to table 1.

Custom Footnotes

Abbreviations : AAUs = assigned amount units, CERs = certified emission reductions, ERUs = emission reduction units, ICERs = long-term certified emission reductions, tCERs = temporary certified emission reductions.

Note: 2011 is the latest reporting year.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b For each reported year, information reported on progress made towards the emission reduction target shall include, in addition to the information noted in paragraphs 9(a-c) of the reporting guidelines, on the use of units from market-based mechanisms.

^c Parties may include this information, as appropriate and if relevant to their target.

^d Units surrendered by that Party for that year that have not been previously surrendered by that or any other Party.

^e Additional rows for each market-based mechanism should be added, if applicable.

Custom Footnotes

NA: Use of CER and ERU cannot be quantified at the time of reporting

Information on updated greenhouse gas projections under a ‘with measures’ scenario^a

	<i>GHG emissions and removals^b</i>							GHG emission projections	
	<i>(kt CO₂ eq)</i>							<i>(kt CO₂ eq)</i>	
	<i>Base year (1990)</i>	1990	1995	2000	2005	2010	2013	2020	2030

Abbreviations : GHG = greenhouse gas, LULUCF = land use, land-use change and forestry.

^a In accordance with the “Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part II: UNFCCC reporting guidelines on national communications”, at a minimum Parties shall report a ‘with measures’ scenario, and may report ‘without measures’ and ‘with additional measures’ scenarios. If a Party chooses to report ‘without measures’ and/or ‘with additional measures’ scenarios they are to use tables 6(b) and/or 6(c), respectively. If a Party does not choose to report ‘without measures’ or ‘with additional measures’ scenarios then it should not include tables 6(b) or 6(c) in the biennial report.

^b Emissions and removals reported in these columns should be as reported in the latest GHG inventory and consistent with the emissions and removals reported in the table on GHG emissions and trends provided in this biennial report. Where the sectoral breakdown differs from that reported in the GHG inventory Parties should explain in their biennial report how the inventory sectors relate to the sectors reported in this table.

^c 20XX is the reporting due-date year (i.e. 2014 for the first biennial report).

^d In accordance with paragraph 34 of the “Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part II: UNFCCC reporting guidelines on national communications”, projections shall be presented on a sectoral basis, to the extent possible, using the same sectoral categories used in the policies and measures section. This table should follow, to the extent possible, the same sectoral categories as those listed in paragraph 17 of those guidelines, namely, to the extent appropriate, the following sectors should be considered: energy, transport, industry, agriculture, forestry and waste management.

^e To the extent possible, the following sectors should be used: energy, transport, industry/industrial processes, agriculture, forestry/LULUCF, waste management/waste, other sectors (i.e. cross-cutting), as appropriate.

^f Parties may choose to report total emissions with or without LULUCF, as appropriate.

United Nations Environment Programme (specific programmes)			400,000.00	531,067.00	Provided	ODA	Grant	Cross-cutting	Other (Multisectorial)
3. Other			100,000.00	132,767.00					
UNISDR			100,000.00	132,767.00	Provided	ODA	Grant	Adaptation	Other (Disaster risk reduction)

Abbreviations: ODA = official development assistance, OOF = other official flows.

^a Parties should fill in a separate table for each year, namely 2011 and 2012, where 2014 is the reporting year.

^b Parties should explain, in their biennial reports, the methodologies used to specify the funds as provided, committed and/or pledged. Parties will provide the information for as many status categories as appropriate in the following order of priority: provided, committed, pledged.

^c Parties may select several applicable sectors. Parties may report sectoral distribution, as applicable, under "Other".

^d This refers to support to multilateral institutions that Parties cannot specify as climate-specific.

^e Parties should explain in their biennial reports how they define funds as being climate-specific.

^f Please specify.

^g Cross-cutting type of support refers to funding for activities which are cross-cutting across mitigation and adaptation.

Abbreviations: ODA = official development assistance, OOF = other official flows; USD = United States dollars.

^a Parties should fill in a separate table for each year, namely 2011 and 2012, where 2014 is the reporting year.

^b Parties should report, to the extent possible, on details contained in this table.

^c Parties should explain, in their biennial reports, the methodologies used to specify the funds as provided, committed and/or pledged. Parties will provide the information for as many status categories as appropriate in the following order of priority: provided, committed, pledged.

^d Parties may select several applicable sectors. Parties may report sectoral distribution, as applicable, under "Other".

^e Parties should report, as appropriate, on project details and the implementing agency.

^f Parties should explain in their biennial reports how they define funds as being climate-specific.

^g Please specify.

^h Cross-cutting type of support refers to funding for activities which are cross-cutting across mitigation and adaptation.

Custom Footnotes

Abbreviations: ODA = official development assistance, OOF = other official flows; USD = United States dollars.

^a Parties should fill in a separate table for each year, namely 2011 and 2012, where 2014 is the reporting year.

^b Parties should report, to the extent possible, on details contained in this table.

^c Parties should explain, in their biennial reports, the methodologies used to specify the funds as provided, committed and/or pledged. Parties will provide the information for as many status categories as appropriate in the following order of priority: provided, committed, pledged.

^d Parties may select several applicable sectors. Parties may report sectoral distribution, as applicable, under "Other".

^e Parties should report, as appropriate, on project details and the implementing agency.

^f Parties should explain in their biennial reports how they define funds as being climate-specific.

^g Please specify.

^h Cross-cutting type of support refers to funding for activities which are cross-cutting across mitigation and adaptation.

Table 8

ESP_BR2_v1.0

Provision of technology development and transfer support^{a,b}

<i>Recipient country and/or region</i>	<i>Targeted area</i>	<i>Measures and activities related to technology transfer</i>	<i>Sector^c</i>	<i>Source of the funding for technology transfer</i>	<i>Activities undertaken by</i>	<i>Status</i>	<i>Additional information^d</i>
All	Mitigation	Clean Energy Ministerial - Working Group on Solar and Wind (RES potential assessment and measure the benefits of RES projects)	Energy	Public	Public	Implemented	2013. The most significant activities carried out by IDAE (Spanish Institute for the Diversification and Saving of Energy) within this group were: Trainings; Global Solar and Wind Atlas, which will be extended to other technologies, such as geothermal, hydro and biomass; and the socio-economic value creation of large-scale solar and wind energy (econValue project).
Burkina Faso, Benin, Cabo Verde, Côte D'Ivoire, Ghana, Gambia, Guinea Conakry, Guinea Bissau, Liberia, Mali, Nigeria, Niger, Senegal, Sierra Leone and Togo	Mitigation	ECOWAS Center for Renewable Energy and Energy Efficiency (ECREEE)	Energy	Public	Public	Implemented	2013. The main objective of this Center is to promote renewable energy and energy efficiency technologies and projects in the ECOWAS region. The start up of the Center has been mainly supported by the Spanish Agency for International Development Cooperation (AECID) and has also been technically supported by IDAE (Spanish Institute for the Diversification and Saving of Energy). More information can be found in www.ecreee.org . In 2013, ECREEE, Casa Africa and the Instituto Tecnológico de Canarias S.A. (ITC) released a publication called "Renewable Energy in West Africa: Status, Experiences and Trends". This publication is a contribution from ECOWAS to the goals of the United Nations Sustainable Energy For All (SE4ALL) Initiative by 2030. IDAE contributed with one of the chapters of the publication.
Jordan	Mitigation	Integration of renewable energy on the electric grid	Energy	Public	Public	Implemented	2013. "The Twinning Project ""Institution Building for the National Electric Power Company (NEPCO) in Jordan"" is an EU funded project that will be implemented by the Institute for the Diversification and Saving of Energy (IDAE) and Red Electrica de España (REE). The purpose of the project is to strengthen the institutional and operative capacity of NEPCO, with regards to renewable energy integration into transmission lines load management, electricity system strategic planning and management, effective use of simulators and neighbourhood interconnected capacity. The integrated approach is focusing on capacity building and international quality standards of equipment, operation and best practice based by EU-Member States. Budget: 1.700.000 € Implementation schedule: September 2013 - September 2015 EU Partners: IDAE and Red Electrica de España (REE) Beneficiary: The Hashemite Kingdom of Jordan / National Electric Power Company (NEPCO)"

Latin America and the Caribbean	Mitigation and Adaptation	Regional Gateway for Technology Transfer and Climate Change Action in Latin America and Caribbean (REGATTA project) - UNEP	Agriculture, Other (Water), Energy, Other (Cross-cutting and Other)	Public	Public	Implemented	2013. REGATTA's project is implemented by UNEP and supported mainly by Spain and other donors. Its main objective is to strengthen capacity and knowledge sharing of climate change technologies and experiences for adaptation and mitigation in Latin America and the Caribbean. The three main components are: on-line Knowledge Platform; key Institutions and Regional Centers of Knowledge and Technology; and specific assistance in mitigation and adaptation to climate change. Activities carried out in 2013 can be found at http://www.cambioclimatico-regatta.org/index.php/es/ .
Countries of West Africa (Pilot project in Cape Verde, Gambia, Mauritania and Senegal)	Adaptation	MARINEMET - Transfer of marine meteorology technology for improving safety of navigation and fishing capacities	Other (Maritime navigation, fishery)	Public	Public	Implemented	2013. In co-operation with Las Palmas University and the Spanish Port Authority. Financed by the World Meteorological Organization through Spanish contributions from the State Meteorological Agency (AEMET).
Argentina, Brazil, Paraguay, Uruguay	Adaptation	VIRTUAL CENTRE FOR EARLY WARNING ALERT-AS: On-line Coordination of operational warnings of weather hazards by South American weather services	Other (Public information, Civil protection, Cross-cutting)	Public	Public	Implemented	2013. In kind contributions of participants and technical support by AEMET (State Meteorology Agency in Spain)
Central América	Adaptation	VIRTUAL CENTRE FOR EARLY WARNING CVACA: On-line Coordination of operational warnings of weather hazards by Central American weather services	Other (Public information, Civil protection, Cross-cutting)	Public	Public	Planned	2013. In kind contributions of participants and technical support by AEMET (State Meteorology Agency in Spain)
Mauritania, Morocco, Algeria, Tunis, Libya, Egypt	Adaptation	Mediterranean Climate Outlook Forum MedCOF: Generation of seasonal forecasts for the Greater Mediterranean Region	Other (Maritime navigation)	Public	Public	Implemented	2013. In co-operation with World Meteorological Organization and the 34 National Weather Services from the Greater Mediterranean Region. The State Meteorological Agency of Spain (AEMET) co-ordinates the Forum and directly funds the participation of the North-African countries. Includes operational forecasts and capacity development in the countries to deal with that information.

<i>Recipient country and/or region</i>	<i>Targeted area</i>	<i>Measures and activities related to technology transfer</i>	<i>Sector^c</i>	<i>Source of the funding for technology transfer</i>	<i>Activities undertaken by</i>	<i>Status</i>	<i>Additional information^d</i>
Noth Africa, Middle East and North Africa	Adaptation	BARCELONA DUST FORECAST CENTER: Regional Specialized Centre of WMO for sand and dust storms forecasts in North Africa, Middle East and Europe	Other (Meteorological services)	Public	Public	Implemented	2013. The Barcelona Dust Forecast Center is co-participated by a consortium of the State Meteorological Agency of Spain (AEMET) and the Barcelona Supercomputing Center/Centro Nacional de Supercomputación (BSC.CNS), part of the Sand and Dust Storm Warning Advisory System (SDS-WAS) of World Meteorological Organization (WMO). Apart from the generation of daily operational dust forecasts, includes capacity development activities in the developing countries to deal with that information.
Morocco, Algeria, Tunis, Egypt	Adaptation	SDS-Africa and GAW-Sahara: Establishment of an aerosol measuring network in the Mahgreb	Other (Meteorological services)	Public	Public	Implemented	2013. In kind contributions of participants and technical support by AEMET (State Meteorology Agency in Spain)
Latin America and the Caribbean	Mitigation and Adaptation	LATIPAT database (patents)	Energy, Transport, Industry, Agriculture, Water and sanitation	Public	Public	Implemented	2013. The Spanish Patent and Trademark Office (OEPM), together with the World Intellectual Property Organization (WIPO) and the European Patent Office (EPO), manages this database, which contains more than one and half million bibliographic data, and over a thousand images, concerning Latin American patents. This instrument has been built up over time, since its inception in 2003, into a reference global database. Besides the databae the OEPM organizes several workshops on issues related to patents and intellectual property for the Latin American and the Caribbean region.
India	Mitigation	Cooperation program signed between CDTI (Spanish Centre for the Development of Industrial Technology) and the Renewable Energy Ministry of INDIA (MNRE)	Energy	Public	Public	Planned	2013. This bilateral programme between CDTI (Spanish Centre for the Development of Industrial Technology) and the Renewable Energy Ministry of INDIA (MNRE) supports different activities for cooperation projects and R&D in the field of Renewable Energies in India.

<i>Recipient country and/or region</i>	<i>Targeted area</i>	<i>Measures and activities related to technology transfer</i>	<i>Sector^c</i>	<i>Source of the funding for technology transfer</i>	<i>Activities undertaken by</i>	<i>Status</i>	<i>Additional information^d</i>
Latin America and the Caribbean	Mitigation and Adaptation	IBEROEKA PROJECTS (support instrument for private technological cooperation in the iberoamerican region)	Energy, Transport, Industry, Agriculture, Water and sanitation	Private and Public	Private and Public	Implemented	2013. The IBEROEKA projects is framed within the Ibero-American Programme for Science, Technology and Development (CYTED) supported by the Spanish Centre for the Development of Industrial Technology (CDTI) with the aims of combining different perspectives and visions to promote cooperation in Research and Innovation for the development of the Latin America region. In 2013, the programme has launched several tenders for the technological cooperation projects in the latinamerican region.
India	Mitigation	Cooperation program signed between CDTI (Spanish Centre for the Development of Industrial Technology) and the Renewable Energy Ministry of INDIA (MNRE)	Energy	Public	Public	Planned	2014. This bilateral programme between CDTI (Spanish Centre for the Development of Industrial Technology) and the Renewable Energy Ministry of INDIA (MNRE) supports different activities for cooperation projects and R&D in the field of Renewable Energies in India.
Latin America and the Caribbean	Mitigation and Adaptation	IBEROEKA PROJECTS (support instrument for private technological cooperation in the iberoamerican region)	Energy, Transport, Industry, Agriculture, Water and sanitation	Private and Public	Private and Public	Implemented	2014. The IBEROEKA projects is framed within the Ibero-American Programme for Science, Technology and Development (CYTED) supported by the Spanish Centre for the Development of Industrial Technology (CDTI) with the aim of combining different perspectives and visions to promote cooperation in Research and Innovation for the development of the Latin America region. In 2014, the programme has launched several tenders for the technological cooperation projects in the latinamerican region.
China	Mitigation	Cooperation program signed between CDTI and the Chinese Innoation Office (TORCH)	Energy, Transport, Industry, Agriculture, Water and sanitation	Public	Public	Planned	2014. This bilateral programme between CDTI (Spanish Centre for the Development of Industrial Technology) and the Chinese Innovation Agency (TORCH) supports different activities for cooperation projects and R&D.
Argentina, Brazil, Paraguay, Uruguay	Adaptation	VIRTUAL CENTRE FOR EARLY WARNING ALERT-AS: On-line Coordination of operational warnings of weather hazards by South American weather services	Other (Public information, Civil protección, Cross-cutting)	Public	Public	Implemented	2014. In kind contributions of participants and technical support by AEMET (State Meteorology Agency in Spain)

Central America	Adaptation	VIRTUAL CENTRE FOR EARLY WARNING CVACA: On-line Coordination of operational warnings of weather hazards by Central American weather services	Other (Public information, Civil protection, Cross-cutting)	Public	Public	Planned	2014. In kind contributions of participants and technical support by AEMET (State Meteorology Agency in Spain)
Countries of West Africa (Pilot project in Cape Verde, Gambia, Mauritania and Senegal)	Adaptation	MARINEMET - Transfer of marine meteorology technology for improving safety of navigation and fishing capacities	Other (Maritime navigation, fishery)	Public	Public	Implemented	2014. In co-operation with the Spanish Port Authority. Financed by the World Meteorological Organization through Spanish contributions from the State Meteorological Agency (AEMET).
Morocco, Lybia, Saudi Arabia, South Africa, Chile, Brazil, Mexico, China and India	Mitigation	Concentrating Solar Energy technology development. Project linked to international collaboration activities of EERA (European Energy Research Alliance) Joint Programme on Concentrating Solar Power (JP-CSP)	Energy	Public	Public	Implemented	2014. "The IRP (Integrated Research Programme) STAGE-STE (Scientific and Technological Alliance for Guaranteeing the European Excellence in Concentrating Solar Thermal Energy) is an EU funded project coordinated by Spanish Centre for Energy-Related, Environmental and Technological Research (CIEMAT) and with a long list of partners (23 EU research organizations, 9 large industrial companies and 9 international (non EU) research organizations, all of them highly relevant to the field of Concentrating Solar Power (CSP). One of the project objectives is to strengthen the collaboration with the countries with higher solar potential with regard to CSP development (countries previously indicated) by developing/assessing the technology improvements that best fit with the specific environmental conditions of such countries. Implementation schedule: February 2014 - January 2018"
Argentina , Brazil , Chile, Colombia, Mexico .	Mitigation	Concentrating Solar Energy technology development. Transfer to the countries participating in the network experience in Spain in the field of SSTC , through seminars, courses and events dissemination of knowledge and technology	Energy	Public	Public	Implemented	2014. The thematic network ESTCI (Concentrating Solar Power for Latin America, www.redcytedestci.org) belongs to the set of thematic networks of Iberoamerican CYTED (Science and Technology for Development , www.cyted.org) and its main objective is to promote the use of solar thermal concentration systems (SSTC) in Latin American countries participating in the network

Egypt, Tunisia, Lebanon	Mitigation	Raising public awareness on energy efficiency through the transferability and implementation of good practices in legal, regulatory, economic, and organizational issues including the promotion of new financing mechanisms to facilitate the take up of solar technologies"	Energy	Public	Public	Implemented	2014. "MEDiterranean DEvelopment of Support schemes for solar Initiatives and Renewable Energies. The main expected results are: Strengthened capacity of public administrations and regional institutions Higher and more diffused competences of local technicians and professionals, facilitating the removal of the main technical barriers for distributed solar technology Innovative tailored financial mechanisms and market stimulation instruments designed to support the widespread diffusion of solar energy technologies Strengthened participatory approaches and increased awareness among public and private local stakeholders A wide consensus achieved among public and private key stakeholders on the central role of renewable energies for sustainable development and environmental protection A co-operation framework established among providers of energy technologies and services in EUMC and MPC to foster the development of a sustainable common energy market "
All	Mitigation	Clean Energy Ministerial - Working Group on Solar and Wind (RES potential assessment and measure the benefits of RES projects), Electric Vehicle Initiative	Energy	Public	Public	Implemented	2014. "The most significant activities carried out by IDAE (Spanish Institute for the Diversification and Saving of Energy) within the Solar and Wind Group were: Global Solar and Wind Atlas, which will be extended to other technologies, such as geothermal (IDAE has provided the Spanish data), hydro and biomass; the socio-economic value creation of large-scale solar and wind energy (econValue project) and the RE auctions report. IDAE has also participated in the activities related with the Electric Vehicle Initiative (jointly with the IEA) More info: http://www.worlddevcities.org/ "

Provision of technology development and transfer support^{a,b}

<i>Recipient country and/or region</i>	<i>Targeted area</i>	<i>Measures and activities related to technology transfer</i>	<i>Sector^c</i>	<i>Source of the funding for technology transfer</i>	<i>Activities undertaken by</i>	<i>Status</i>	<i>Additional information^d</i>
Burkina Faso, Benin, Cabo Verde, Côte D'Ivoire, Ghana, Gambia, Guinea Conakry, Guinea Bissau, Liberia, Mali, Nigeria, Niger, Senegal, Sierra Leone, Togo	Mitigation	ECOWAS Center for Renewable Energy and Energy Efficiency (ECREEE)	Energy	Public	Public	Implemented	2014. The main objective of this Center is to promote renewable energy and energy efficiency technologies and projects in the ECOWAS region. The start up of the Center has been mainly supported by the Spanish Agency for International Development Cooperation (AECID) and has also been technically supported by IDAE (Spanish Institute for the Diversification and Saving of Energy). More information can be found in www.ecreee.org . At a regional workshop organized by ECREEE in March 2014 in Abidjan, Cote d'Ivoire, ECOWAS Member States discussed and adopted the framework for the development and implementation of the regional RE&EE policies and the SE4ALL Action Agendas at the national level. To support this process, ECREEE and its partners have provided a team of national and international experts to assist each Member State in 2014 and IDAE is part of this team.
Jordan	Mitigation	Integration of renewable energy on the electric grid	Energy	Public	Public	Implemented	2014. "The Twinning Project ""Institution Building for the National Electric Power Company (NEPCO) in Jordan"" is an EU funded project that will be implemented by the Institute for the Diversification and Saving of Energy (IDAE) and Red Electrica de España (REE). The purpose of the project is to strengthen the institutional and operative capacity of NEPCO, with regards to renewable energy integration into transmission lines load management, electricity system strategic planning and management, effective use of simulators and neighbourhood interconnected capacity. The integrated approach is focusing on capacity building and international quality standards of equipment, operation and best practice based by EU-Member States. Budget: 1.700.000 € Implementation schedule: September 2013 - September 2015 EU Partners: IDAE and Red Electrica de España (REE) Beneficiary: The Hashemite Kingdom of Jordan / National Electric Power Company (NEPCO)"

Table 8

<i>Recipient country and/or region</i>	<i>Targeted area</i>	<i>Measures and activities related to technology transfer</i>	<i>Sector^c</i>	<i>Source of the funding for technology transfer</i>	<i>Activities undertaken by</i>	<i>Status</i>	<i>Additional information^d</i>
Viet Nam	Mitigation	Impuls to the deployment of the renewable energy based on the Spanish experience	Energy	Public	Public	Implemented	<p>2014. "The deployment of solar energy projects in a country or in wide regions needs of prior precise information on the available solar resources. For making decisions about energy policy, in addition to the solar radiation estimation, it will be necessary to analyze the potential use of the solar technologies in the country. The methodology and works for the potential assessments depend strongly on each specific technology. Thus, even for a specific technology, scenarios taking into account the type of applications, installations power, local incentives and/or its evolutions during the next years have to be considered.</p> <p>Under the framework of a project promoted by the Spanish Agency for International Development Cooperation (AECID) for strengthen the capacities of the Vietnamese government to take decisions concerning the solar energy sector, the General Directorate of Energy of Ministry of Industry and Trade of Vietnam (MoIT) and CIEMAT (representing a Spanish consortium formed by CIEMAT, CENER and IDAE) signed an agreement to address the Phase I of this project focused on mapping the solar resource and potential in Vietnam. Implementation schedule: June 2013 - January 2015"</p>
Latin America and the Caribbean	Mitigation and Adaptation	LATIPAT database (patents)	Energy, Transport, Industry, Agriculture, Water and sanitation	Public	Private and Public	Implemented	<p>2014. The Spanish Patent and Trademark Office (OEPM), together with the World Intellectual Property Organization (WIPO) and the European Patent Office (EPO), manages this database, which contains more than one and half million bibliographic data, and over a thousand images, concerning Latin American patents. This instrument has been built up over time, since its inception in 2003, into a reference global database. Besides the database the OEPM organizes several workshops on issues related to patents and intellectual property for the Latin American and the Caribbean region.</p>

Table 8

ESP_BR2_v1.0

Provision of technology development and transfer support^{a,b}

<i>Recipient country and/or region</i>	<i>Targeted area</i>	<i>Measures and activities related to technology transfer</i>	<i>Sector^c</i>	<i>Source of the funding for technology transfer</i>	<i>Activities undertaken by</i>	<i>Status</i>	<i>Additional information^d</i>
All countries (available to the public)	Mitigation and Adaptation	Collaboration with Technological Platforms	Energy, Transport, Industry, Agriculture, Water and sanitation	Public	Private and Public	Implemented	2014. A collaboration commitment was contracted by the OEPM with these Platforms in 2012, the aim of which is to make patent information available to companies, researchers and R&D managers so that the technology they generate is technology with value that allows financial returns and improves the competitiveness of the companies and their internationalisation.
All countries (available to the public)	Mitigation and Adaptation	Technology Alerts	Other ("Geothermal Energy Biocides and plant growth regulators of biological origin Solar Thermal Energy Concentration Carbon Nanomaterials Viticulture and Enology Fuel Cells")	Public	Private and Public	Implemented	2014. Technology Alerts provide up-to-date information about the most recent patents being published around the world related to a particular technical theme. The thematic areas of each Alert are established in collaboration with the Technology Platforms to ensure that they address the specific information needs of companies and public research institutions in the different technology sectors. Once a theme of interest is determined, the patent examiners establish a search strategy to enable any user to consult the Alert to find out about the latest patents published in any country in the world related to the theme in question (Geothermal Energy, Biocides and plant growth regulators of biological origin, Solar Thermal Energy Concentration, Carbon Nanomaterials, Viticulture and Enology, Fuel Cells). OEPM.
All countries (available to the public)	Mitigation and Adaptation	Integrity of the Collection of Spanish Patents Project	Energy, Transport, Industry, Agriculture, Water and sanitation	Public	Private and Public	Implemented	2014. This project started in 2014 to facilitate enterprises and all users access to the entire collection of Spanish Patents and Utility Models through INVENES data base. Its main goal is to achieve that the data contained in the database are complete and updated since 1930, and that they meet the criteria of the PCT minimum documentation. For this purpose, bibliographic revision tasks as well as digitization of all memories of Patents and Utility Models of the Spanish collection have been carried out. OEPM.

^a To be reported to the extent possible.^b The tables should include measures and activities since the last national communication or biennial report.^c Parties may report sectoral disaggregation, as appropriate.^d Additional information may include, for example, funding for technology development and transfer provided, a short description of the measure or activity and co-financing arrangements.**Custom Footnotes**

Table 9

Provision of capacity-building support^a

<i>Recipient country/region</i>	<i>Targeted area</i>	<i>Programme or project title</i>	<i>Description of programme or project^{b,c}</i>
Latinamerican	Multiple Areas	Support and collaboration with several countries in the region and with OLADE in issues related to Energy Efficiency and Renewable Energies activities	2013. During 2013, IDAE (the Spanish Institute for the Diversification and Saving of Energy) has maintained bilateral collaborations with most of the countries in the region as well as with relevant agencies, such as the Latin American Energy Organization (OLADE) or ONUDI on issues related to Energy Efficiency and Renewable Energies. IDAE has collaborated with several countries and participated in several important events such as the 5th Latinamerican Workshop on Energy Efficiency, May 2013 (Quito, Ecuador)
Africa	Multiple Areas	Improved Drought Early Warning and Forecasting to strengthen preparedness and adaptation to droughts in Africa” (DEWFORA) - VII Framework Programme - http://www.dewfora.net/	2013. The main aim of DEWFORA is to reduce vulnerability and strengthen preparedness to droughts in Africa by advancing drought forecasting, early warning and mitigation practices. To this aim, a framework for monitoring, predicting, timely warning and responding to droughts at the seasonal time scale will be developed, applicable within the institutional context of African countries. At longer time scales, the project will also contribute to improve the identification of vulnerable regions taking into account the increased hazard due to climate change, and develop feasible adaptation measures. Project/Activity developed with the support of the Spanish Research Centre for the Management of Agricultural and Environmental Risks (CEIGRAM).
Latinamerican	Multiple Areas	Iberoamerican Network of Climate Change Offices (RIOCC) workshops	2013. The Iberoamerican Network of Climate Change Offices (RIOCC) is a platform that works with the aim of maintaining a continued dialogue among countries on climate change to better understand the priorities, challenges and experiences of the iberoamerican region. The RIOCC meets formally on an annual basis and promotes several regional capacity building workshops and regional studies in those areas identified as a priority for the countries. Spain is the main supporter of all these activities (through the Ministry of Agriculture, Food and Environment and the Spanish Agency for International Development Cooperation, AECID) . In, 2013 a regional workshop on "Existing Tools and Methodologies for Mitigation options and policies focusing on Energy and Agriculture" took place in Cartagena de Indias (Colombia). More information about this workshop can be found at www.lariocc.es
Latinamerican	Multiple Areas	Iberoamerican Network of Climate Change Offices (RIOCC) Annual meetings	2013. The Iberoamerican Network of Climate Change Offices (RIOCC) is a platform that works with the aim of maintaining a continued dialogue among countries on climate change to better understand the priorities, challenges and experiences of the iberoamerican region. The RIOCC meets formally on an annual basis and promotes several regional capacity building workshops and regional studies in those areas identified as a priority for the countries. Spain is the main supporter of all these activities (through the Ministry of Agriculture, Food and Environment and the Spanish Agency for International Development Cooperation, AECID). The Annual meeting celebrated in 2013 took place in Santiago de Chile and was organized in collaboration with ECLAC and the Ministry of Environment of Chile. The results of the meeting can be found at www.lariocc.es
Bolivia	Multiple Areas	Training courses	2014. Integrating Energy Efficiency and Renewable Energy in Rural and Urban Environments supported by the Spanish Centre for Energy-Related, Environmental and Technological Research (CIEMAT) and Spanish Agency for International Development Cooperation (AECID),

Provision of capacity-building support^a

<i>Recipient country/region</i>	<i>Targeted area</i>	<i>Programme or project title</i>	<i>Description of programme or project^{b,c}</i>
Latinamerican	Multiple Areas	Ibero-American Programme for Science, Technology and Development (CYTED)	2013. The Spanish Centre for Energy-Related, Environmental and Technological Research (CIEMAT) participates in this CYTED Programme which is an intergovernmental multilateral Science and Technology cooperation programme aiming to combine different perspectives and visions to promote cooperation in Research and Innovation for the development of the Latin America region. CIEMAT participates specifically in energy, sustainable development and climate change and TIC's activities within this programme.
Latinamerican	Multiple Areas	Capacity Building Programme in Renewable Energy for Latin America and The Caribbean (ONUDI)	2013. The Spanish Centre for Energy-Related, Environmental and Technological Research (CIEMAT) participates in this specialized project that brings together seven renewable technologies in seven modules e-learning, offering a solid and specialized education and training in renewable energy program.
	Technology Development and Transfer	Training course on quality air observation and forecasting	2014. Funded by the State Meteorological Agency of Spain (AEMET) and the Spanish Agency for International Development Cooperation (AECID), part of the activities of CIMHET.
West Africa	Adaptation	HEALTHMET: International Course on Climate Change and Human Health	2013. Support of the State Meteorological Agency of Spain (AEMET) to the attendance of African pupils to this International Course
Viet Nam	Multiple Areas	Supporting the design of a public-private system of agricultural risk management in Vietnam, as a tool for climate change adaptation	2013. Given that a high proportion of the Viet Nam population and economic assets (including irrigated agriculture) are located in coastal lowlands and deltas, this country has been ranked among the five countries likely to be most affected by climate change. Specific research of each sector is needed, in order to design a valid insurance for each production and risk. In addition, there is a need to improve the technical capacities in both public and private sector. This together with spreading and promotion among farmers. These are some of the goals to tackle in the context of this project. Project/Activity developed with the support of the Spanish Research Centre for the Management of Agricultural and Environmental Risks (CEIGRAM).
Latinamerican	Multiple Areas	Iberoamerican Network of Climate Change Offices (RIOCC) Annual meetings	2014. The Iberoamerican Network of Climate Change Offices (RIOCC) is a platform that works with the aim of maintaining a continued dialogue among countries on climate change to better understand the priorities, challenges and experiences of the iberoamerican region. The RIOCC meets formally on an annual basis and promotes several regional capacity building workshops and regional studies in those areas identified as a priority for the countries. Spain is the main supporter of all these activities (through the Ministry of Agriculture, Food and Environment and the Spanish Agency for International Development Cooperation, AECID). The Annual meeting celebrated in 2014 took place Lima, Perú, and was organized in collaboration with the Ministry of Environment of Perú. The results of the meeting can be found at www.lariocc.es
Mexico, Latin America and the Caribbean	Adaptation	Workshop on National Drought Policies in Mexico, Central America and the Caribbean	2013. Funded by the State Meteorological Agency of Spain (AEMET) and the Spanish Agency for International Development Cooperation (AECID), part of the activities of CIMHET in support of the Integrated Drought Management Programme of World Meteorological Organization and Global Water Partnership

Table 9

Provision of capacity-building support^a

<i>Recipient country/region</i>	<i>Targeted area</i>	<i>Programme or project title</i>	<i>Description of programme or project^{b,c}</i>
South America	Adaptation	Workshop on National Drought Policies in South America	2014. Funded by the State Meteorological Agency of Spain (AEMET) and the Spanish Agency for International Development Cooperation (AECID), part of the activities of CIMHET in support of the Integrated Drought Management Programme of World Meteorological Organization and Global Water Partnership
Latin America and the Caribbean	Technology Development and Transfer	Training course on homogeneization and regionalization of climate data	2013. Funded by the State Meteorological Agency of Spain (AEMET) and the Spanish Agency for International Development Cooperation (AECID), part of the activities of CIMHET.
West Africa	Technology Development and Transfer	METAGRI-OPS: Meteorological Support to Agriculture in West Africa, Workshop on the SARRA-H Crop Model	2013. In kind support of the State Meteorological Agency of Spain (AEMET) to this workshop, funded by World Meteorological Organization and EUMETSAT, among others.
Bolivia, Guatemala, Haiti, Honduras, Nicaragua, Paraguay	Multiple Areas	Analysys of Agricultural Environmental Risks and Strategies to improve adaptation and mitigation to climate change in collaboration with Universities in Chile and Brazil	2013. The project has examined the role of environmental risks to water security in Latin America and Spain. Has been evaluated the performance on water and food security in LA and Caribbean. The apparent abundance of water resources in AL, contrasts with Gaps indicators Water Security and Food Water security risks. Project/Activity developed with the support of the Spanish Research Centre for the Management of Agricultural and Environmental Risks (CEIGRAM).
Nicaragua	Multiple Areas	Assessing the sustainability of subsistence farming in San Jose Cusmapa, Nicaragua.	2013. Assessing the sustainability of subsistence farming in mountain areas on the Central subtropics, using indicators. Project/Activity developed with the support of the Spanish Research Centre for the Management of Agricultural and Environmental Risks (CEIGRAM).
Ethiopia	Multiple Areas	Development and planning for the implementation of good soil management practices in order to increase agricultural productivity and improve environmental sustainability in the soil and climatic conditions of Ethiopia.	2013. The project seeks to establish a plan of action for the development of best management practices for addressing soil degradation, land resource management and agricultural productivity, to identify areas of research and capacity building for further collaboration projects towards enhancing land resource management and agricultural productivity on smallholder farms, in order to help rural households dependent on the sustainability of soil and land resources to achieve food security, gender equity and improved livelihoods. Project/Activity developed with the support of the Spanish Research Centre for the Management of Agricultural and Environmental Risks (CEIGRAM).
Senegal, Burkina Faso, Kenya, South Africa, Brazil, Guyana	Multiple Areas	An Integration of Mitigation and Adaptation options for sustainable Livestock production under climate CHANGE (ANIMALCHANGE) - VII Framework Programme - http://www.animalchange.eu/	2013. Providing knowledge, models and tools for promoting sustainable livestock production systems with both reduced climate change vulnerability and reduced greenhouse gas emissions. Guidance to development cooperation concerning developing countries that are most affected and that have the least capacity to deal with climate change. Project/Activity developed with the support of the Spanish Research Centre for the Management of Agricultural and Environmental Risks (CEIGRAM).

Provision of capacity-building support^a

<i>Recipient country/region</i>	<i>Targeted area</i>	<i>Programme or project title</i>	<i>Description of programme or project^{b,c}</i>
Nicaragua	Multiple Areas	Reducing vulnerability in impoverished areas through access to drinking water, sanitation and sustainable water management and spatial approach to river basin	2013. 1) Preparation of a proposal to include the gender perspective in the development of the irrigation district, 2) Analysis of the pros and cons of the different legal personalities who can take an irrigation district in Nicaragua, 3) systematization process development of irrigation district by a set of indicators and metrics, 4) methodological proposal for an analysis of the implementation of the legal framework for water resources at local level, municipalities and community groups operating in the area of the action. Project/Activity developed with the support of the Spanish Research Centre for the Management of Agricultural and Environmental Risks (CEIGRAM).
United Republic of Tanzania	Multiple Areas	Renewable Energy Resource Mapping	2014. Spanish Centre for Energy-Related, Environmental and Technological Research (CIEMAT)- Design and development of Capacity building program associated with the project in collaboration with the World Bank, in partnership with CENER , IrSOLaV , Energio Verda and Geonica
West Africa	Technology Development and Transfer	METAGRI-OPS: Meteorological Support to Agriculture in West Africa.	2014. In kind support of the State Meteorological Agency of Spain (AEMET) to this workshop, funded by World Meteorological Organization and EUMETSAT, among others.
West Africa	Adaptation	HEALTHMET: Satellite and ground observation and modelling of atmospheric dust	2014. Support of the State Meteorological Agency of Spain (AEMET) to the attendance of African pupils to this International Course
Brazil, Bolivia, Guyana	Multiple Areas	Role of Biodiversity In climate change mitigation (ROBIN) - VII Framework Programme - www.robinproject.info	2013. "Quantify: the role of biodiversity in terrestrial ecosystems in South and Mesoamerica in mitigating climate change; local and regional interactions between biodiversity, land use and climate change mitigation potential and the delivery of other key ecosystem services. Evaluate: the socio-ecological consequences of changes in biodiversity and ecosystem services under climate change; Evaluate the effects of current climate change mitigation policies and actions on ecological and socio-economic conditions. Analyse the impacts of alternative land-use scenarios (and other mitigation options) aimed at maximising climate mitigation potential while minimising loss of biodiversity and ecosystem services and avoiding undesirable ecological and socio-economic effects. Provide guidance on land-use planning and other climate change mitigation options such as low carbon strategies and bio-fuel production. Project/Activity developed with the support of the Spanish Research Centre for the Management of Agricultural and Environmental Risks (CEIGRAM)."
Latinamerican	Multiple Areas	Regional Workshop on "Natural Areas Management facing Global Climate Change": Adaptation design and management"	2014. Workshop carried out in Antigua (Guatemala) in 2014, by the Spanish National Parks Autonomous Agency (OAPN) and the Spanish Agency for International Development Cooperation (AECID)
Latinamerican	Multiple Areas	Renewable energy management: Future Prospects	2014. Spanish Centre for Energy-Related, Environmental and Technological Research (CIEMAT) - Webinar: "Using CALCUGEI tool." For participants from the Latin American Network of Experts on Energy
Latin America and the Caribbean	Multiple Areas	Courses	2014. The Spanish Patent and Trademark Office (OEPM) organizes several workshops on issues related to Intellectual Property for the Latin American and the Caribbean region (patents, trademarks, designs, strategic planification,...).

Table 9

Provision of capacity-building support^a

<i>Recipient country/region</i>	<i>Targeted area</i>	<i>Programme or project title</i>	<i>Description of programme or project^{b,c}</i>
South America	Technology Development and Transfer	Training course on Automatic Hydrometeorological Stations Network Management	2014. Funded by the State Meteorological Agency of Spain (AEMET) and the Spanish Agency for International Development Cooperation (AECID), part of the activities of CIMHET.
Suriname	Multiple Areas	Support of Modernization of Public Agricultural Services in Surinam - Irrigation and Drainage	2013. As a result of the project will be defines an action plan to deal with irrigation and drainage policy and/or institutional issues, and will suggest a stepwise approach to implement the agreed upon reforms and investments in a scenario of climate change adaptation. Project/Activity developed with the support of the Spanish Research Centre for the Management of Agricultural and Environmental Risks (CEIGRAM).
Latin America and the Caribbean	Multiple Areas	Annual Meeting of the Conference of Ibero-American Directors of National Hydrological and Meteorological Services (CIMHET)	2014. The Conference of Ibero-American Directors on National Hydrological and Meteorological Services (CIMHET) is a platform that works with the aim of maintaining a continued dialogue among countries on climate, meteorology and hydrology to better understand the priorities, challenges and experiences of the iberoamerican region. The CIMHET meets formally on an annual basis and promotes several regional capacity building workshops and regional studies in those areas identified as a priority for the countries. The meetings and activities are funded by Spain, in coordination with World Meteorological Organization (WMO). The results of the last annual meetings as well as the last workshops and other activities are in www.cimhet.org
Latin America and the Caribbean	Multiple Areas	CIBIT Programme	2014. Capacity-building program in patent search and technological information promoted by the Spanish Patent and Trademark Office (OEPM), which aims to develop a line of cooperation that promotes the adhesion of the Latin American countries to the PCT (Patent Cooperation Treaty). The main objectives of this program are: improving the training of Latin American examiners in international searches for PCT international applications and enhancing collaboration of Latin American Industrial Property National Offices with the OEPM.
Honduras	Multiple Areas	Climate Change Impacts on Maize and Dry Bean Yields of smallholder farmers in Honduras.	2013. Low productivity systems, together with an uncertain future climate, pose a high level of risk for food security. Crop model assessment of climate change impacts (2070-2099 compared to a 1961-1990 baseline) on a maize-dry ben rotation for several sites across a range of climatic zones and elevations in Honduras. The cropping systems simulation dynamic model CropSyst was calibrated and validated upon field trail site at Zamorano, then run with baseline and future climate scenarios based upon general circulation models (GCM) and the ClimGen synthetic daily weather generator. Project/Activity developed with the support of the Spanish Research Centre for the Management of Agricultural and Environmental Risks (CEIGRAM).
Latin America and the Caribbean	Technology Development and Transfer	Training course on homogeneization and regionalization of climate data	2013. Funded by the State Meteorological Agency of Spain (AEMET) and the Spanish Agency for International Development Cooperation (AECID), part of the activities of CIMHET.

Provision of capacity-building support^a

<i>Recipient country/region</i>	<i>Targeted area</i>	<i>Programme or project title</i>	<i>Description of programme or project^{b,c}</i>
Latinamerican	Adaptation	Iberoamerican Network of Climate Change Offices (RIOCC) workshops	2014. The RIOCC promotes several regional capacity building workshops and regional studies in those areas identified as a priority for the countries. Spain is the main supporter of all these activities (through the Ministry of Agriculture, Food and Environment and the Spanish Agency for International Development Cooperation, AECID) . In, 2014 a regional workshop on "Adaptation to climate change" took place in Santa Cruz (Bolivia) in collaboration with UNEP (REGATTA Project). More information about this workshop can be found at www.lariocc.es
Latinamerican	Multiple Areas	Iberoamerican Network of Climate Change Offices (RIOCC) workshops	2014. The RIOCC promotes several regional capacity building workshops and regional studies in those areas identified as a priority for the countries. Spain is the main supporter of all these activities (through the Ministry of Agriculture, Food and Environment and the Spanish Agency for International Development Cooperation, AECID). In 2014 a regional workshop on "National Appropriate Mitigation Actions-NAMAs- on the Renewable Energy sector" took place in Montevideo (Uruguay). The workshop was organized in collaboration with the the Energy and Agriculture& Enviroment Ministries from Uruguay, UNEP (REGATTA Project) and the International Renewable Energy Agency (IRENA). More information about this workshop can be found at www.lariocc.es
Uruguay	Multiple Areas	Workshop on integrating climate change in subnational planning instruments	2013. Workshop carried out in Montevideo (Uruguay) in 2013 supported by the Spanish Agency for International Development Cooperation (AECID) in collaboration with the Ministry of Environment of Uruguay
Latinamerican	Multiple Areas	Regional Workshop on "Natural Areas Management facing Global Climate Change": Regional Surveillance Network"	2013. Workshop carried out in Antigua (Guatemala) in 2013, by the Spanish National Parks Autonomous Agency (OAPN) and the Spanish Agency for International Development Cooperation (AECID)
Latin America and the Caribbean	Multiple Areas	Annual Meeting of the Conference of Ibero-American Directors of National Hydrological and Meteorological Services (CIMHET)	2013. The Conference of Ibero-American Directors on National Hydrological and Meteorological Services (CIMHET) is a platform that works with the aim of maintaining a continued dialogue among countries on climate, meteorology and hydrology to better understand the priorities, challenges and experiences of the iberoamerican region. The CIMHET meets formally on an annual basis and promotes several regional capacity building workshops and regional studies in those areas identified as a priority for the countries. The meetings and activities are funded by Spain, in coordination with World Meteorological Organization (WMO). The results of the last annual meetings as well as the last workshops and other activities are in www.cimhet.org

^a To be reported to the extent possible.

^b Each Party included in Annex II to the Convention shall provide information, to the extent possible, on how it has provided capacity-building support that responds to the existing and emerging capacity-building needs identified by Parties not included in Annex I to the Convention in the areas of mitigation, adaptation and technology development and transfer.

^c Additional information may be provided on, for example, the measure or activity and co-financing arrangements.
